### PROJECT

**Title:** E-Voting System(2018)

**Description:** E- Voting is a web-based voting system that will help you manage your elections easily and securely. This voting system can be used for casting votes during the elections held in colleges, etc.

**Title:** Cyber Café Management System(2019)

**Description:** Cyber Café Management is a complete package developed for management of systems in a cyber café. This project is intended to be used in a Cyber Café. All cyber cafes have some basic needs likeable to control the systems that are being rented to the customers and are charged on timely basis.

**Title:** Indian Coin Separator and Counting using Edge Detection Technique(2020)

**Description:** Automation holds a vital role in nearly all walks of the human life. Separation and counting of Indian currency coins is considered in this project. Nearly all the temples in India have donation boxes (Hundi). More human intervention is required to separate such coins and hence it could be automated and as a result it improves efficiency and reduces the time consumption in the process.
